

Message from the CEO

Dear Colleagues,

This festive season holds a special significance. The last two years, we witnessed darkness of a different kind, that was unknown to us and took us all by shock. Despite the unfortunate circumstances we stood tall, fought together, stood by each other, and shared a common hope. A hope to overcome this pandemic with compassion and professionalism.

Your grit and perseverance are a testimony to the fact that we have successfully completed 90,000 IVF Pregnancies this year and the 1 Lakh mark is not too far. This milestone has not been achieved by any other IVF hospital and for years to come, we will be the only organization to have hoisted this momentous flag. I would like to thank all our doctors, IVF specialists, nurses, and staff for their commitment and zeal. To our team of CXOs - thank you all for being patient and focusing on the goal that mattered the most.

You should feel immensely proud of the work you have been putting in and the impact we continue to make in our customer's life.

Together, let us conquer each and every challenge that comes our way. Together, let us have a fantastic year ahead.

And while we celebrate our success, let this ease in the environment not prevent you from taking the necessary precautions to keep you and your family safe.

I wish that this coming new year brings you and your family safety, good health, and above all peace.

Regards,
Dr. Kshitiz Murdia
Co-Founder and CEO

The Importance of Online reviews

Review is a medium by which a person surveys the product or service and writes about their personal opinion or views. Today all companies have an online presence and hence it is easier for people to review online in a few clicks.
